As fellow team members in the healthy development of your children, the faculty at UPWS strives to ensure that all our parents/guardians feel heard, regarded, and well-informed. We strive for transparency, clarity, and timely communication. At this point, a more formal chain of communication will be initiated to ensure that all of these things happen and that all parties are able to move forward in a safe, equitable, and healthy environment. Please see the Parent Handbook for more details.
